PRESENTER:

TARGET AUDIENCE

This program is designed for Occupational Therapists, Occupational Therapy Assistants, Physical Therapists, Physical Therapist Assistants, Assistive Technology Professionals, and Medical Suppliers/Providers.

COURSE OVERVIEW

This one-hour course is intended to help clinicians and providers expand on their current knowledge and skills to achieve greater success and clinical confidence with manual wheelchair provision. Through mobility user case examples linked to key clinical concepts and research, open discussion, as well as practical applications of equipment intervention, it will also examine the role of the wheelchair provision process within the larger context of the rehabilitation. Highlighted within the course will be the importance of individualized goals and assessments.

This course will cover concepts related to various types of manual wheelchair users and propulsion styles. Upon completion, participants will be able to adapt and apply the clinical reasoning and practical application skills gained to improve outcomes and enhance client function in a variety of settings. For those newer to wheelchair seating and mobility, this course will also be beneficial in reframing their existing clinical knowledge through a more specific lens unique to manual mobility users.

LEVEL- Introductory | **INSTRUCTIONAL METHOD-** Synchronous Live On-site or Streaming Lecture or /Discussion / Clinical Applications / Demonstration

CEU OBJECTIVES

By the end of the presentation, participants will be able to:

1. Describe 3 elements from the complex rehab technology seating and mobility evaluation that are different from a standard Occupational and Physical Therapy client evaluation.
2. Identify 2 ways configurability of manual wheelchair systems impacts user participation.
3. Describe 2 elements of the relationship between posture and wheelchair propulsion biomechanics.
4. Identify 3 elements from the Wheelchair Skills Test that can be used in client assessment training and justification.

STATEMENT OF CLINICAL RELEVANCE

Content of the activity directly relates to the scope of practice of occupational and physical therapy as defined by the American Occupational Therapy Association (AOTA) and the American Physical Therapy Association (APTA). Visit our website www.permobilus.com for more details.

COMPLETION REQUIREMENTS

In order to obtain CEU/CCU credits, participant must attend the entire course, sign in and out, and complete an on-line course assessment following completion of the course.

OUTLINE

Minutes	Topic
10	Introduction/relationship of CRT provision and OT/PT specialization
20	Clinical Concepts of Wheelchair Mobility
20	Configuring for Function
10	Summary/Reflective Practice and Knowledge Translation

CONTACT HOURS- 1 | **CEUS-** 0.1
