## The Future of Prescription: What role will AI play

### About

One of the biggest technological advancements currently facing industries globally is the implementation of Artificial Intelligence (AI). What can AI offer in the area of prescribing AT? Is it a tool that can assist in the ever-increasing amounts of report writing associated with the justification processes of prescribing Assistive Technology? Can it assist us manage the paperwork demands? What are some of the advantages and disadvantages of using these technologies to complete funding justifications?

This session will provide a historical understanding of the development of AI and consider the ways in which it may be applicable to current practice. Discussion on the foundations of clinical reasoning will guide the group in considering the role AI may play in future prescription processes.

### Speaker

**Tracee-Lee Maginnity BHSoc (OT)**  
Permobil Clinical Services Specialist

Tracee-Lee Maginnity joined Permobil Australia in July 2019, as a clinical education specialist. Originally from New Zealand, she graduated Auckland University of Technology with a BHSoc (Occupational Therapy) in 2003 and has since worked in various roles related to seating and mobility including assessing, prescribing and educating. After gaining experience as an assessor and prescriber at Seating To Go / Wheelchair Solutions in prescribing for both disability and injury, she moved to Australia in 2011 to take on the Senior Occupational Therapist role in a custom moulded seating service. She then worked in clinical consulting and education roles until joining Permobil. Tracee-Lee is passionate about maximising functional outcomes with end users and the importance of education within the industry. She has mentored many therapists interested in AT. Her experience includes working with complex postures to achieve custom outcomes. Tracee-Lee is also an international wheelchair rugby classifier where she enjoys the task analysis of wheelchair propulsion and functional capacity identification of athletes.
