Considering Cushion Selection: How can we use ISO testing data to assist in the process

About

ISO Cushion standards are based on objective, scientific laboratory analysis of support surfaces. These tests measure the critical characteristics of wheelchair cushions. Can these tests contribute to evidence-based practice to assist in the clinical reasoning processes when determining potential solutions?

How can this standardised, lab-based data be considered along with the needs and goals of the individual? What else do we need to consider when identifying cushion most appropriate for an individual users? Come along and join us in this session where we will deep dive into the concepts and uses of ISO testing to support clinical reasoning.

Details

Date: Thursday 7 November 2024
Time: 2:00 PM - 2:45 PM
Room: Room 1
Venue: Due Drop Events Centre, 770 Great South Road, Wiri

Speaker

Tracee-Lee Maginnity BHSoc (OT)
Permobil Clinical Services Specialist

Tracee-Lee Maginnity joined Permobil Australia in July 2019, as a clinical education specialist. Originally from New Zealand, she graduated Auckland University of Technology with a BHSoc (Occupational Therapy) in 2003 and has since worked in various roles related to seating and mobility including assessing, prescribing and educating. After gaining experience as an assessor and prescriber at Seating To Go / Wheelchair Solutions in prescribing for both disability and injury, she moved to Australia in 2011 to take on the Senior Occupational Therapist role in a custom moulded seating service. She then worked in clinical consulting and education roles until joining Permobil. Tracee-Lee is passionate about maximising functional outcomes with end users and the importance of education within the industry. She has mentored many therapists interested in AT. Her experience includes working with complex postures to achieve custom outcomes. Tracee-Lee is also an international wheelchair rugby classifier where she enjoys the task analysis of wheelchair propulsion and functional capacity identification of athletes.
