## The Future of Prescription: What role will AI play

### About

One of the biggest technological advancements currently facing industries globally is the implementation of Artificial Intelligence (AI). What can AI offer in the area of prescribing AT? Is it a tool that can assist in the ever-increasing amounts of report writing associated with the justification processes of prescribing Assistive Technology? Can it assist us manage the paperwork demands? What are some of the advantages and disadvantages of using these technologies to complete funding justifications?

This session will provide a historical understanding of the development of AI and consider the ways in which it may be applicable to current practice. Discussion on the foundations of clinical reasoning will guide the group in considering the role AI may play in future prescription processes.

### Speaker

#### Tilly Brook MOccThy (Hons) (OT)

Permobil Director Clinical Services

Tilly Brook graduated from the University of Adelaide in 2008 with a Bachelor of Health Science followed by a Masters of Occupational Therapy (Hons) in 2010 from the University of Sydney. Tilly worked within rehabilitation, working primarily with adults with a brain injury until 2015 when she moved to Singapore. In Singapore, she worked with children and adults at the Cerebral Palsy Alliance School (CPAS). In 2017 Tilly's clinical knowledge continued as she worked with Mobility Solutions in Auckland, New Zealand. On her return to Australia, Tilly assisted in the development of the Clinical Hub Team at Sunrise Medical where her passion and experience for mentoring and educating therapists grew. Tilly Joined Permobil in January 2022 and is driven to grow therapists, enabling them to be the best therapist they can be.
