for every individual

permobil

# Individualised for you

We offer advanced assistive solutions for every individual, for all ages, sizes, needs, and abilities. You should always be empowered to move in comfort and in style.

Over Permobil's 55 years of innovating, we have created thousands of adaptations to our power wheelchairs, bespoke to individuals needs. And based on this experience, we have now developed a range of standard adaptations to make individualizing a chair easier than ever.

Our dedicated customization team in Timra, Sweden are always committed to engineering special adaptations. So if you're requirements aren't met through our standard offerings, please contact your local Permobil representative to discuss.

For more info, please visit:

## Standard adaptations

Our selection of standard adaptations have been developed based on them being regularly requested through our customization process. But we can also provide knowledge and engineer solutions towards more advanced requirements, using our dedicated teams expertise and our design bank.

If we have not created a specific solution in the past, we are ready to innovate to fit needs within the CE-mark of the power wheelchair or we can go further and develops a unique custom-made device.

## Custom-made device

Whenever the customization request takes us outside the limits of the Declaration of Conformity of the product, we can often meet the requirements through a custom-made device.

The pre-requisite to this is a prescription issued by a qualified person, authorized by national law. The prescription should include; name of patient, design characteristics required and the details of the authorized person submitting request.

“Adapting our chairs to deliver a solution meeting a users exact needs to aid their everyday life and independence – that’s something we’re proud of.”

– Åke, Customisation, Sweden
